Solutions as a Service?

SaaS (Software as a Service) kennen we inmiddels allemaal wel, maar wij doen dat net even anders: **Solutions as a Service**. Op maat gemaakte oplossingen voor een **vast bedrag per maand**. Speciaal voor MKB's of organisaties die niet een softwareteam of een team van solution architects kunnen veroorloven. Heb je een uitdaging voor ons?

New at DiodeMatrix

The brand new DIOMTEC Cloud

Our new cloud forms the backbone of (almost) all our digital services and solutions. It's our home and it's becoming more accessible to external users! Technically inclined or just curious about our cloud? Read on to learn more!

IPv4 & IPv6 Support

All nodes in our cloud are by default equipped with both a (private and public) IPv4 and an IPv6 address. And for the true IPv6 adventurers, it is now even possible to activate an IPv6-only node 😎

Freedom (DNS)

What is yours, stays yours. That's why we offer a DNS service in our cloud. You retain control over your domain and can link it to our cloud using our nameservers. This way, you maintain control and always have the freedom to leave our platform. We believe that is important
